### PART 3. READING

Choose the word (A, B, C or D) that best fits the blank space in the following passage.

School holidays (21) \_\_\_\_\_ an essential break for students to take a breath and recharge. However, some argue that the holidays are too long, and students lose the momentum they built up in the (22) \_\_\_\_\_ term. In my opinion, I believe that school holidays should not be shorter.

(23) \_\_\_\_\_, students need time to relax and de-stress from the demands of school life; this is especially important for students who have a lot of extracurricular activities or who struggle with mental health. Shorter holidays would deprive them of this essential time to (24) \_\_\_\_\_ and recuperate.

Secondly, students need time to pursue their (25) \_\_\_\_\_ and passions outside of the classroom. Lengthy holidays provide ample time for students to explore their hobbies, develop new skills, and volunteer in their communities.

In summary, while shorter school holidays may seem like a good idea on the surface, they could have negative consequences on students' well-being and personal growth. Therefore, I believe that school holidays (26) \_\_\_\_\_ remain at their current length.

**Read the following passage and choose the correct answer to each of the questions.**

#### Life in the Future

Planet Earth has many problems. Different kinds of pollution are harming the planet. The world's population is continuing to grow each year. Many people believe that in the future, we will have to find a new place to live.

Space stations are one place where people could live. People can build parts of a space station on Earth and then put **them** together in space. It will be easier for people to live on space stations than different planets. One bad thing is there won't be any gravity, and people won't be able to move much.

Some scientists think Mars is the best option. People won't be able to go outside on Mars, but we can build new cities there. We need to build **better** spaceships because they cost too much money now. Some people think that Venus will also be an option because the gravity is similar to Earth's. However, the weather on Venus is too hot for people to live there.
